PERSONAL STATEMENT

BSc (Honours) Computing and IT (Software) graduate with hands-on experience designing and deploying full-stack web applications. Strong foundation in software engineering, object-oriented programming, and API integration. Experienced in building React and Next.js applications with custom backend logic. Seeking a Junior Software Engineer, Front-End, or Full-Stack Developer role.

TECHNICAL SKILLS

Languages	JavaScript (ES6+), TypeScript, Python, Java
Frontend	React, Next.js, HTML5, CSS
Backend	Node.js, REST APIs
Databases	SQLite, SQL fundamentals
Tools & Platforms	Git, GitHub, Vercel, Docker (basic), AWS (basic), Windows, Linux, MacOS
Concepts	Object-Oriented Programming, Data Structures, Asynchronous Programming, Agile Methodologies

PROJECTS

Random Steam Game Picker

Next.js | React | Node.js | Steam Web API | Vercel – <https://randomsteamgame.co.uk/>

Production full-stack web application that generates filtered random game recommendations from a user's Steam library.

- Integrated Steam Web Api
- Implemented advanced filtering
- Developed multi-user shared library matching for co-op game recommendations
- Built custom API route with asynchronous data fetching and error handling
- Deployed to Vercel

Portfolio Website

HTML | CSS | JavaScript – <https://bogdaneftimie.co.uk/>

- Designed and built a personal portfolio site from scratch
- Custom dark and light mode with smooth transitions
- Simple and responsive layout
- Deployed to GitHub Pages with a custom domain

BoxMemory (*In Testing*)

React Native | iOS | Android – <https://boxmemory.uk/>

Storage organisation mobile app for iOS and Android that helps users track packed boxes with visual records and location-based organisation.

- Integrated photo capture and content documentation for packed boxes
- Implemented location-based tagging and room storage organisation
- Built search and filtering functionality for quick item retrieval
- Designed a privacy-focused architecture with fully on-device data storage
- Developed backup and restore functionality

BoxMemory - Website

HTML | CSS | JavaScript – <https://boxmemory.uk/>

- Designed and built a landing page for the BoxMemory mobile app
- Showcased app features, screenshots, and privacy policy information
- Developed a responsive layout with smooth transitions
- Implemented dark mode support

Gym Log – React Native Mobile App (*In Progress*)

React Native | Expo | AsyncStorage

Personal mobile application for fully customizable gym workout tracking.

- Built custom workout template system with fine-tuned controls over warmup sets, reps, weight, %1RM, RPE, rest, and notes
- Implemented local data persistence using AsyncStorage with backup export, restore and full data reset
- Full offline functionality and no account required
- Developed customizable home screen and navigation, workout history calendar, and activity tracker
- Built progress and bodyweight tracking with one rep max calculator
- Implemented multi theme UI with dark, dim, and light mode and three adjustable font sizes

EDUCATION

BSc (Honours) Computing and IT (Software)

2021 – 2024

Open University

Key modules:

- Software Engineering
- Object-Oriented Java Programming
- Algorithms, Data Structures & Computability
- Data Management & Analysis

Certifications

- Networking Essentials – Cisco Networking Academy (2022)

Additional

Languages

- English (Fluent)
- Portuguese (Native)
- Romanian (Native)
- Spanish (Intermediate)

Full UK Driving License
